

69TH CONFERENCE ON
CHALLENGING EXPECTATIONS & EXCEEDING GOALS
EXCEPTIONAL CHILDREN

**Peer-Implemented Instruction: A Model for Inclusive Literacy for
Students with Low Incidence Disabilities**

Brett Cerrato, Alicia Saunders, & Robert Pennington

Disclaimer

Presentation materials are for registered participants of the 69th Conference on Exceptional Children. The information in this presentation is intended to provide general information and the content and information presented does not reflect the opinions and/or beliefs of the NC Department of Public Instruction, Exceptional Children Division. Copyright permissions do not extend beyond the scope of this conference.

Session Objectives:

In this session, participants will be able to:

- Describe the benefits of alternate achievement literacy instruction for students with low incidence disabilities,
- Gain information on how to implement evidence-based prompting procedures within curricula designed for students with low incidence disabilities,
- Visualize how peers can be used to implement instruction with students with low incidence disabilities,
- Recall the steps for implementing variations of behavior skills training (BST)

Inclusion Made Practical for All Children and Teachers (IMPACT)

3 year model-demonstration grant

- Improve outcomes in comprehension skills of students with ID
- Support teachers to align instruction to grade level content standards and promote access to the general curriculum
- Develop strategies and tools to support implementation of the comprehension model in inclusive classrooms
- Provide intensive coaching to support implementation of model in both special education and general education settings to promote sustainability

The research reported here was supported by the Office Special Education Programs, U.S. Department of Education, through Grant H326M180005 (Project IMPACT) to the University of North Carolina at Charlotte. The opinions expressed are those of the authors and do not represent views of the OSEP or the U.S. Department of Education.

	Literal Recall	Inferential
Level 1	Look back NS Verbal "Look back in the text". Re-read. Wait time. Repeat the question.	Look back NS Verbal "Look back in the text". Reread. Wait time. Repeat the question.
Level 2	Look here Direct Verbal "Let's see if the answer is in this section." Point and reread. Repeat the question.	A clue Direct Verbal Engage in Think Aloud "I see a clue". Point and reread. Repeat the question.
Level 3	Model Silently point to the answer. Repeat the question.	Model Silently point to the clue(s). Repeat the question.
Level 4	Full Physical Student touch answer board.	Full Physical Student touch answer board.
Response Board	Visual SUPPORT Wait time. Reveal answers for students who can not generate answer. Repeat the question.	Visual SUPPORT Wait time. Reveal answers for students who can not generate answer. Repeat the question.

The research reported here was supported by the Office of Special Education Programs, U.S. Department of Education, through Grant H326M180005 (Project IMPACT) to the University of North Carolina at Charlotte. The opinions expressed are those of the authors and do not represent views of the OSEP or the U.S. Department of Education.

Why Teach Literacy?

- The goal of learning for students with significant cognitive disabilities is to enhance quality of life
- Instruction in literacy provides a unique tool for promoting quality of life through increasing communicative competence, including comprehending and producing messages
- While not all student may learn to read, all should have the opportunity to learn to access, understand, and produce text

Consider all the ways you access text on a daily basis

Leisure, independent living, job

Glass Ceilings

- Historically, our efforts focused on teaching a limited set of “functional reading skills”
 - Reading and writing one’s name
 - Reading fast food menu words
- We permitted students to participate “alongside their peers” but did not require them to make progress

Smashing Through the Ceiling

- Now data suggest that students with extensive support needs can indeed make progress within the general curriculum
 - Learn about the world around them
 - Learn how to learn
 - Participate in meaningful ways with their peers

Alternative Achievement Literacy

- Promoting access to the general curriculum
- Aligning instruction with state standards
- Providing opportunities for students with extensive support needs to experience the same age and grade level literature as their peers
- Generalizable skill for life

Alternative Achievement Literacy

- Comprehending passages of connected texts
 - Using some combination of reading and listening skills
 - With option of using technology to access the text
- Apply this comprehension across both narrative and informational text
 - For participation in inclusive school contexts
 - For job and daily living activities
 - For personal enjoyment of literature
- Continue to improve reading and writing skills

Promoting Comprehension

NRP recommends 6 strategies for promoting comprehension

- Comprehension monitoring
- Cooperative learning
- Graphic and semantic organizers
- Question answering*
- Question generation
- Summarizing
 - *Most research for this population has focused on question answering

The Challenge of Tackling Comprehension

- Requires receptive and expressive skills
- Requires attention
- Requires short term memory
- Requires reading between the lines to make inferences
 - These areas can be difficult for our learners

Why Peers?

- Increase opportunities to respond
- Peers are just as effective at delivering the instruction
- Reduced stigma when compared to paraprofessional, especially in middle and high school
- Increased opportunities for social interaction

Why Behavior Skills Training?

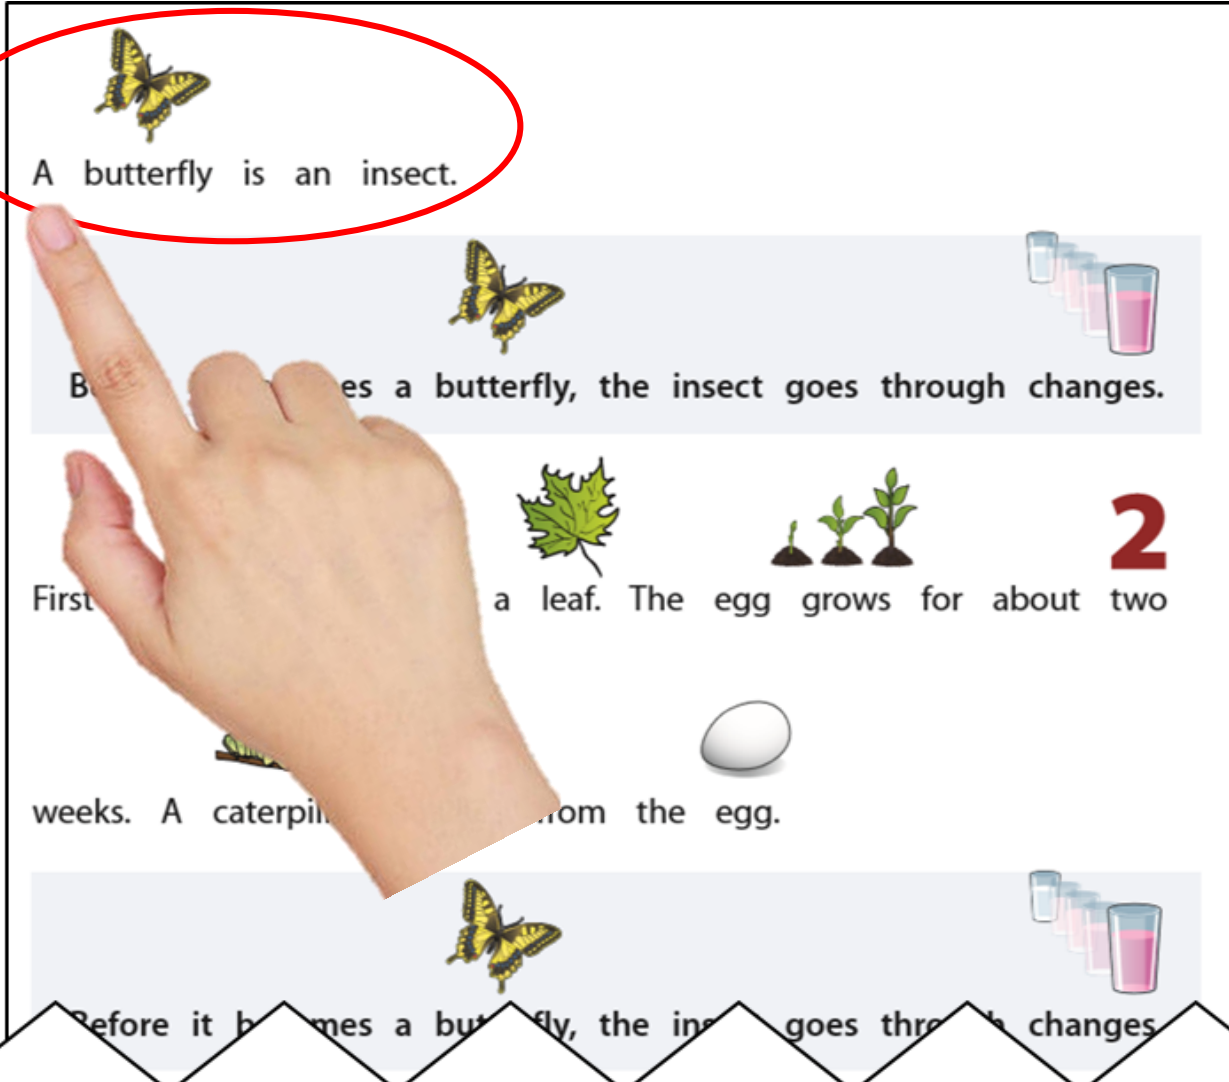

- D** • Provide Written **Directions** to Peers
- M** • **Model** how to implement program
- R** • Do direct **rehearsal** 1:1 with the peers, providing feedback as you go
 - Goal: 90% or higher fidelity
- C** • Provide **ongoing coaching** to keep fidelity high

Remember D-M-R-C

Alternate Achievement Literacy

The Ultimate Goal of this approach is to teach students to look back in the text for answers!

1. How to adapt text
2. How to teach comprehension*

A butterfly is an insect.

Before it becomes a butterfly, the insect goes through changes.

First, it eats a leaf. The egg grows for about two weeks. A caterpillar hatches from the egg.

Before it becomes a butterfly, the insect goes through changes.

The image shows a hand pointing to a butterfly illustration in a text passage. The passage is divided into sections with butterfly icons and illustrations of a leaf, an egg, and a caterpillar. The text describes the life cycle of a butterfly. A red oval highlights the first sentence, and a hand points to it from the left. The passage is framed by a decorative border at the bottom.

Adapting Text:

Start with Age- and Grade-appropriate Text

- Promotes access to the general curriculum
- Aligns with state standards by teaching the same curriculum
- Provides an opportunity to experience the same age and grade level literature/text as peers without disabilities
- Where to find the text?
 - Same as being used by general education teachers
 - Media specialist/ librarian
 - <https://access.uncc.edu/parent-teacher-and-educator-resources/assorted-general-curriculum-projects-adapted-texts>

Adapting Text:

- If choosing from a website, be cautious:
 - Many have been overadapted with picture symbols
 - Make sure key literary elements have NOT been removed
 - Characters & Setting
 - Main idea
 - Sequencing
 - Word study
 - Theme
 - Context/Foreshadowing
- If adapting text by summarizing chapters:
 - Pre-read text
 - Summarize each chapter to capture main idea- provide details
 - Re-write chapter summary:
 - Aim for grade 2-3 listening comprehension level
 - Use Lexile Framework for Reading™ website, obtain Lexile level, adjust if needed to Level 400-600, plain text format

Adapting Text:

- Re-write text by summarizing chapters using considerate text:
 - Add picture symbols to **key** vocabulary only (max 2-3 per line!)
 - Add definitions to text
 - Add explanations to text
 - Use Repeated Story Line to support main idea of each chapter

Cheaper by the Dozen

Dad had a special way of calling all of us together quickly. It was called the assembly call.

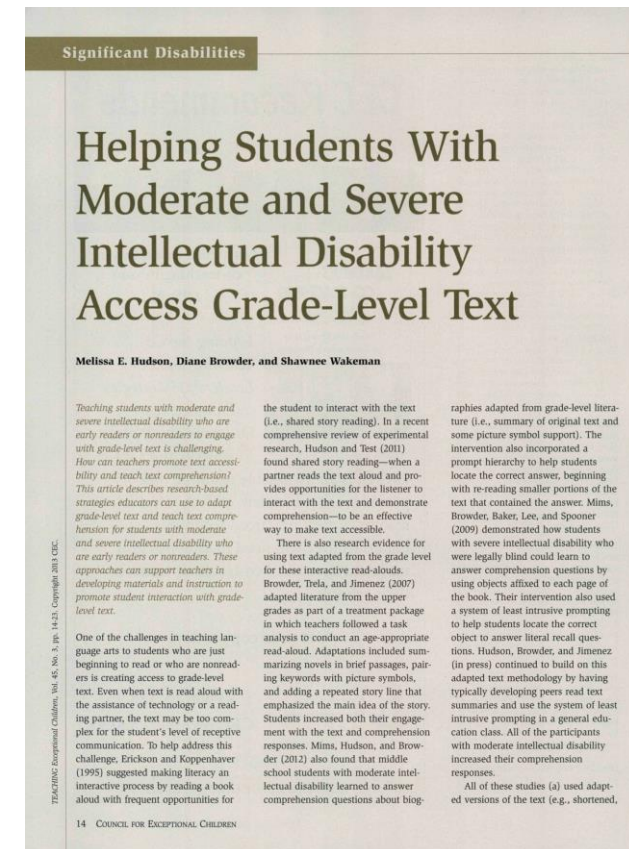

Assemble means to get together.

Dad would blow a whistle. Then, we would all line up in the front of the house. One time, there was a small fire in the driveway. Dad called us together and we put out the fire with buckets of water.

- **Dad was proud of his family.**

For more information on adapting text

- Hudson, Browder, & Wakeman (2013). Helping students with moderate and severe intellectual disability access grade-level text. *TEACHING Exceptional Children*, 45, 14-23.
- access.uncc.edu
- Rule of Thumb: NO more different than necessary!
- Reread of actual text to students
- Watch the movie at the end

System of Least Prompts (SLP)

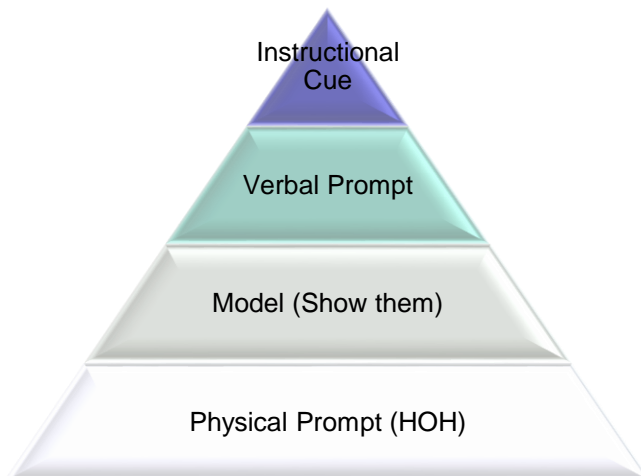

- A hierarchy of prompts also called least intrusive prompting
- Progress from the **least intrusive prompt** to the **most intrusive prompt**
- Wait interval* between each prompt until the student makes the targeted response
- Can be used by a variety of interventionists
 - Peer, paraprofessional, general education teacher, or special education teacher

*Wait interval-established time each individual student needs to process

Guidelines for Using System of Least Prompts

- Select 3 – 4 prompts in the hierarchy (e.g., verbal, gesture/model, physical).
- Remember these prompts can be adapted for students with a range of sensory impairments and needs.
 - Examples:
 - Students with visual impairments: nonspecific verbal, specific verbal, physical
 - Students with hearing impairments: sign/gesture, model, physical

Think of 2 students with different learning needs. Where on the hierarchy would you begin as the least intrusive prompt? Why?

Guidelines for Using System of Least Prompts

1

Provide Question/directive

Provide the task direction/natural cue (e.g., “Who is the main character in the story?”).

2

Ask and WAIT

Always give the student an opportunity to make the correct response before providing any prompting on each step of the *Prompt Hierarchy*.

3

**Progress through Hierarchy
Least to Most**

Use the least intrusive prompt first and progress to more intrusive prompts until the learner responds correctly (usually 3 to 5 second delay between prompts).

4

Provide appropriate feedback

Provide specific feedback to the student to confirm what the student did to meet the expectation. When appropriate use praise and/or a reinforcer

System of Least Prompts for Literal Questions

	Literal Recall	Inferential
Level 1	<p>Look back</p> <p>NS Verbal</p> <p>"Look back in the text". Re-read Wait time. Repeat the question.</p>	<p>Look back</p> <p>NS Verbal</p> <p>"Look back in the text". Re-read Wait time. Repeat the question.</p>
Level 2	<p>Look here</p> <p>Direct Verbal</p> <p>"Let's see if the answer is in this section." Point and reread. Repeat the question.</p>	<p>Look here</p> <p>Direct Verbal</p> <p>Engage in Think Aloud "I see a clue". Point and reread. Repeat the question</p>
Level 3	<p>Model</p> <p>Silently point to the answer. Repeat the question.</p>	<p>Model</p> <p>Silently point to the clue(s). Repeat the question.</p>
Level 4	<p>Full Physical</p> <p>Student touch answer board.</p>	<p>Full Physical</p> <p>Student touch answer board.</p>
Response Board	<p>Visual SUPPORT</p> <p>Wait time. Reveal answers for students who can not generate answer. Repeat the question.</p>	<p>Visual SUPPORT</p> <p>Wait time. Reveal answers for students who can not generate answer. Repeat the question.</p>

Level 1	<p>Look back</p>	<p>NS Verbal</p> <p>"Look back in the text". Re-read Wait time. Repeat the question.</p>
Level 2	<p>Look here</p>	<p>Direct Verbal</p> <p>"Let's see if the answer is in this section." Point and reread. Repeat the question.</p>
Level 3		<p>Model</p> <p>Silently point to the answer. Repeat the question.</p>

The research reported here was supported by the Office of Special Education Programs, U.S. Department of Education, through Grant H326M180005 (Project IMPACT) to the

University of North Carolina at Charlotte. The opinions expressed are those of the authors and do not represent views of the OSEP or the U.S. Department of Education.

Office of Special Education Programs
U.S. Department of Education

Goal: Provide student a chance for unprompted answer

****Self-generated response***

1. Read the question
2. Utilize student's wait time
3. Allow student to give answer
4. If self-generated response provided...
5. Evaluate if answer is correct or close enough to provide credit
 1. If correct, provide specific feedback
 2. If incorrect, follow SLP until student provides the correct answer

What type of living thing is a butterfly?

Provide Response Options

For students who do not generate an answer without support. Most students should not need this support

1. Read the question
2. Utilize student's wait time
3. When clear that student does not have a self-generated answer...
4. Remove answer shield
5. Repeat the question
6. Touch each potential answer as you read it

Correct Answer

Erika, what type of living thing is butterfly?

It's an insect!

Great answer Erika, a butterfly is an insect!

What type of living thing is a butterfly?

Error Correction

What type of living thing is a butterfly?

Curtis, what type of living thing is butterfly?

It's a cow!

Lets read this paragraph again...

I don't know

Lets read this sentence ...

A caterpillar

****Pointing to insect in text****

Insect!

Yes an insect! Great looking in the book.

Level 1		NS Verbal "Look back in the text". Re-read Wait time. Repeat the question.
Level 2		Direct Verbal "Let's see if the answer is in this section." Point and reread. Repeat the question.
Level 3		Model Silently point to the answer. Repeat the question.

System of Least Prompts for Literal Questions

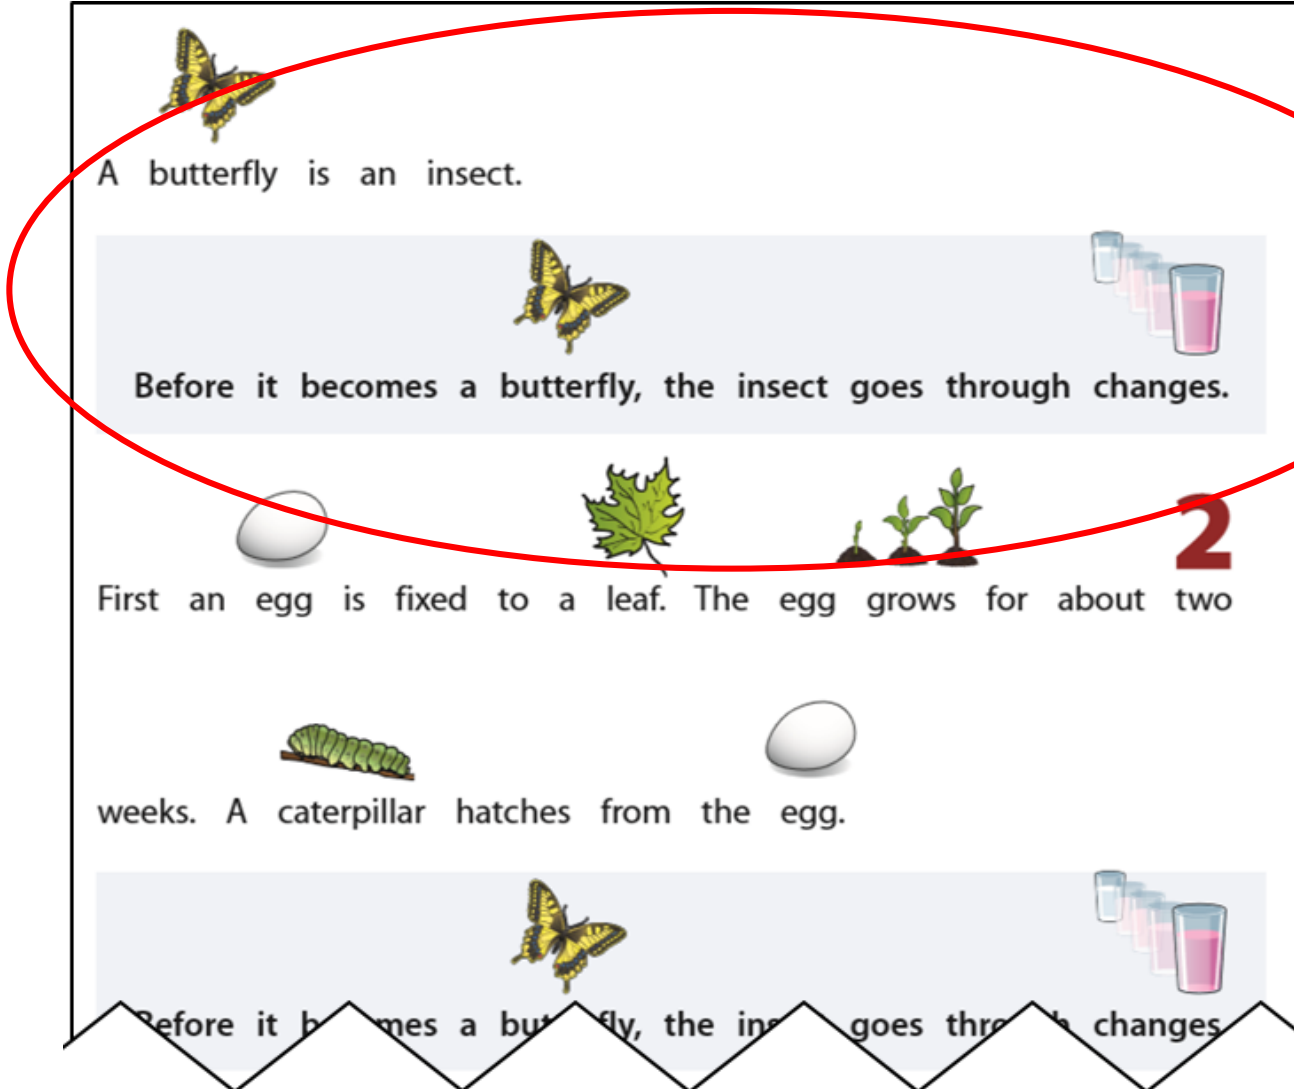

LEVEL 1

Level 1		NS Verbal "Look back in the text". Re-read Wait time. Repeat the question.
---------	---	---

Goal: Student uses a smaller section of text to find the answer.

1. Verbally prompt student to sentences around and including the answer
 2. Reread the sentences
 3. Utilize student's wait time
 4. Repeat the question
- * Touch each potential answer on response board as you read it

A butterfly is an insect.

Before it becomes a butterfly, the insect goes through changes.

First an egg is fixed to a leaf. The egg grows for about two weeks. A caterpillar hatches from the egg.

Before it becomes a butterfly, the insect goes through changes.

System of Least Prompts for Literal Questions

LEVEL 2

Level 2	<p>Look here</p> <p>Hi, I am a radio αρχηερ ατ ηοσυε. The radio was big. λοπε μυφοβ.</p>	<p>Direct Verbal</p> <p><i>“Let’s see if the answer is in this section.”</i></p> <p>Point and reread. Repeat the question.</p>
---------	---	---

Goal: Student re-listens and hears answer or only looks for answer within one sentence.

1. Point to and read sentence with answer while student finger points
2. Utilize student’s wait time
3. Once student stops looking or you anticipate they will not find the answer...
4. Repeat the question
5. Touch each potential answer on response board as you read it

A butterfly is an insect.

Before it becomes a butterfly, the insect goes through changes.

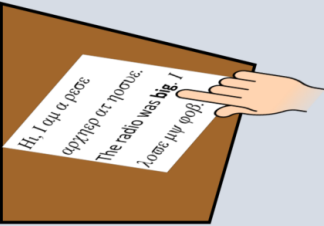

First, it eats a leaf. The egg grows for about two weeks. A caterpillar hatches from the egg.

Before it becomes a butterfly, the insect goes through changes.

System of Least Prompts for Literal Questions

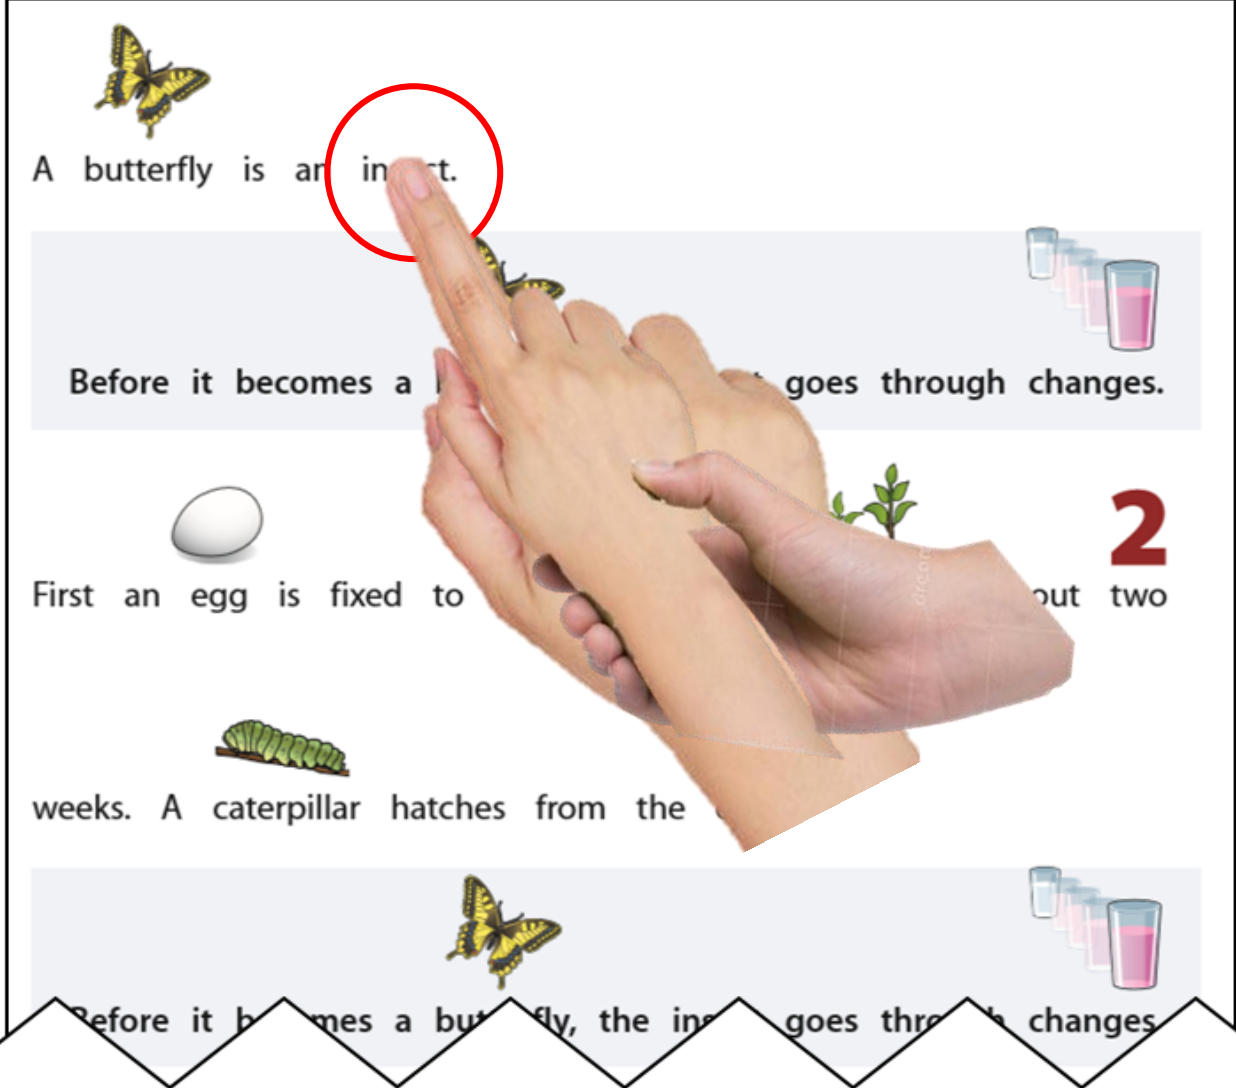

LEVEL 3

Level 3		Model Silently point to the answer. Repeat the question.
---------	---	---

Goal: Student focuses and sees the answer and mimics the teacher's model.

1. Silently point to the answer
*After looking, if student provides answer verbally -> accept the answer
2. Utilize student's wait time
3. Once student stops looking or you anticipate they will not find the answer...
4. Repeat the question
5. Touch each potential answer on response board as you read it

A butterfly is an insect.

Before it becomes a butterfly, the insect goes through changes.

First an egg is fixed to a leaf for about two weeks. A caterpillar hatches from the egg.

Before it becomes a butterfly, the insect goes through changes.

System of Least Prompts for Literal Questions

LEVEL 4

Goal: Student engages in actively providing the answer in *Response Book*

1. After touching the text...
2. Repeat the question
3. Silently model or physically prompt student to touch the answer on response board
4. Provide small, specific feedback

What type of living thing is this?

Lizard Mammal Insect

System of Least Prompts for Inferential Questions

	Literal Recall	Inferential
Level 1	<p>Look back</p> <p>NS Verbal</p> <p>"Look back in the text". Re-read Wait time. Repeat the question.</p>	<p>Look back</p> <p>NS Verbal</p> <p>"Look back in the text". Reread Wait time. Repeat the question.</p>
Level 2	<p>Look here</p> <p>Direct Verbal</p> <p>"Let's see if answer is in this section." Point and reread. Repeat the question.</p>	<p>A clue</p> <p>Direct Verbal</p> <p>Engage in Think Aloud "I see a clue". Point and reread. Repeat the question</p>
Level 3	<p>Model</p> <p>Silently point to answer. Repeat the question</p>	<p>Model</p> <p>Silently point to the clue(s). Repeat the question.</p>
Level 4	<p>Full Physical Prompt</p> <p>Student touch answer board.</p>	<p>Full Physical Prompt</p> <p>Student touch answer board.</p>
	<p>Response Board</p> <p>Visual SUPPORT</p> <p>Wait time. Reveal answers for students who can not generate answer. Repeat the question.</p>	<p>Response Board</p> <p>Visual SUPPORT</p> <p>Wait time. Reveal answers for students who can not generate answer. Repeat the question.</p>

University of North Carolina at Charlotte. The opinions expressed are those of the authors and do not represent views of the OSEP or the U.S. Department of Education.

Office of Special Education Programs
U.S. Department of Education

Goal: Provide student a chance for unprompted answer

****Self-generated response***

1. Read the question
2. Utilize student's wait time
3. Allow student to give answer
4. If self-generated response provided...
5. Evaluate if answer is correct or close enough to provide credit
 1. If correct, provide specific feedback
 2. If incorrect, follow SLP until student provides the correct answer

Why were Japanese-American citizens sent to camps?
Was it because _____?

Provide Response Options

For students who do not generate an answer without support. Most students should not need this support

1. Read the question
2. Utilize student's wait time
3. When clear that student does not have a self-generated answer...
4. Remove answer shield
5. Repeat the question
6. Touch each potential answer as you read it

System of Least Prompts for Inferential Questions

LEVEL 1

Level 1		NS Verbal "Look back in the text". Re-read Wait time. Repeat the question.
---------	--	---

Goal: Student uses a smaller section of text to find the answer.

1. Verbally prompt student to sentences around and including the answer
2. Reread the sentences
3. Utilize student's wait time
4. Repeat the question

*Touch each potential answer on response board as you read it

Francis, took over their businesses. Everyone worked hard and enjoyed each other's cultures. The families were neighbors. On December 7, 1941, Japan attacked Pearl Harbor. Pearl Harbor is in the state of Hawaii. People started hearing stories that Japanese-Americans were going to be sent away to camps in Colorado. People who were sent to these camps could not leave.

RIGHT ON READER 1 Unit Two • Neighbors • 125

System of Least Prompts for Inferential Questions

LEVEL 2

Level 2	<p>A clue</p> <p>Hi, I αμ α ρεσε αρχηερ ατ ηοσε. The radio was big. I λοσε μψ φοβ.</p>	<p>Direct Verbal</p> <p>Engage in Think Aloud</p> <p>"I see a clue".</p> <p>Point and reread.</p> <p>Repeat the question</p>

Goal: Student re-listens and hears a clue or only looks for clue within one sentence.

1. Point to and read sentence with clue while student finger points
2. Utilize student's wait time
3. Once student stops looking or you anticipate they will not find the clue...
4. Repeat the question

*Touch each potential answer on response board as you read it

The response board is a large graphic with a scalloped border. It contains several text panels with icons. The top panel shows a house icon and the text "enjoyed each other's cultures." Below it is a panel with a family icon and the text "The families were neighbors." The middle panel is circled in red and contains a map of Japan, an airplane icon, and the text "On December 7, 1941, Japan attacked Pearl Harbor. Pearl Harbor". Below this is a panel with a map of Hawaii, a person on a phone icon, and the text "is in Hawaii. People started hearing stories that". The bottom panel contains a person pointing icon, a fence icon, and the text "Japan ... ing to be sent away to camps in". A hand is pointing to the circled text.

System of Least Prompts for Inferential Questions

LEVEL 3

Level 3		Model Silently point to the clue(s). Repeat the question.
---------	--	--

Goal: Student focuses and sees the answer and mimics the teacher's model.

1. Silently point to the answer

*After attaining, if student provides answer verbally -> accept the answer

2. Utilize student's wait time

3. Once student stops looking or you anticipate they will not find the answer...

4. Repeat the question

*Touch each potential answer on response board as you read it

enjoyed each other's cultures.

The families were neighbors.

On December 7, 1941, Japan attacked Pearl Harbor. Pearl Harbor is in the state of Hawaii.

Japanese-Americans were going to live in camps.

hearing stories that

System of Least Prompts for Inferential Questions

LEVEL 4

Goal: Student engages in actively providing the answer in *Response Book*

1. After touching the text...
2. Repeat the question
3. Silently model or physically prompt student to touch the answer on response board
4. Provide small, specific feedback

An example of a Level 4 inferential question. A hand points to the text '...e-American citizens sent to camps? because _____?'. Below the text are three answer choices, each with an illustration and text: 1. A person in a blue balaclava holding a gun, with the text 'they were bad'. 2. An airplane flying over a city, with the text 'Japan attacked Harbor'. 3. A hamburger, with the text 'they wanted hamburgers'. A large red 'O' is overlaid on the second choice, and a large red 'R' is overlaid on the third choice. A hand is also shown pointing to the second choice.

Activity

- Your turn!
 - Work with the person next to you
 - 1 person will be the student, 1 person will be the teacher
 - Do both literal and inferential
 - Goal is to go through all steps of SLP so do not get it right!
- [picture removed for PDF]

CHAPTER 4

A Soc Dies

 Ponyboy decided to hang out with Johnny for a while

 to calm down before going back home. They went to the

 empty lot to hang out. Then, two Socs in the blue Mustang

 **2**  pulled up. One of them tried to drown Ponyboy in the

 fountain. He held his head under water. Johnny got  **1**  angry

 and **2**  **3**  accidentally killed the other boy.

 The boys felt like outsiders.

2  The two boys realized they needed to get out of town fast.

 They needed help. They went to see Dally. He told them to

 take the train to Windrixville and hide in the old church on

 **4**   Jay Mountain. Johnny and Ponyboy found the church. Right away,

 Johnny went to the store. When he got back, he cut Ponyboy's

1. Predict: The Socs are holding Ponyboy's head underwater. What do you think will happen next?

1. Ponyboy will fightback and escape
2. Johnny will save Ponyboy
3. The Socs hurt Ponyboy very badly

2. I see one of our vocabulary words on the page. The word is angry. Find the word angry on the page.

3. I see one of our vocabulary words on the page. The word is accidentally. Find the word accidentally on the page.

4. Who did Johnny and Ponyboy go to for help? Was it....

1. Cherry
2. Justin
3. **Dally**

5. I will show you some different places in the story. You tell me if the picture is a setting of the outsiders or not a setting, then we will place it on this chart.

Old church, drive-in theatre, White house, Empty lot, Amusement park

Example and Non-example Training

- Strategy used to teach concept formation
- Present many examples of the targeted concept alongside non-examples (in random order)
- Vary *irrelevant* features
- Keep *relevant* features consistent
 - In ELA, present many examples of characters, but the “relevant” characters are ones that pertain to the chapters read

Example and Non-example Training

- **Concept Formation Feedback and Error Correction**

- Cue, “Touch dog”

Great job finding “dog”!

- Reinforce correct identification of the concept.

- Correct errors.

This is “dog.”

Example and Non-example

- This strategy promotes active student responding
- Can utilize a choral response from all students
- Students utilize sorting skills
- Students who are nonverbal can participate by utilizing an augmentative/ alternative communication (AAC) device
